shire' (Oxford, 1705), the first edition of which appeared in 1677. This work was the forerunner of the numerous 'County Histories' that have been subsequently issued.

Finally, attention may be drawn to the earliest figure and description of that flightless bird, the solitaire, in a book by the French traveler François Leguat, printed at London in 1708. The solitaire formerly inhabited the island of Rodriguez, and became extinct about the end of the eighteenth century.

STATISTICS OF EASTERN, STATE AND FOREIGN UNIVERSITIES.

In an address before the University of Michigan, printed in the *Atlantic Monthly*, Dr. Henry S. Pritchett showed a table giving

THE EIGHTEENTH SEASON OF THE MARINE BIOLOGICAL LABORATORY. 1905.

THE regular season for investigators opened June 1 and continued through most of September. During this period there were in attendance 71 investigators, of whom 63 occupied private rooms with an average period of attendance of about six weeks to two months.

Students receiving instruction were in session from June 28 to August 9, and the total attendance was 57, a much smaller number than in the years previous to 1903, owing to the raising of the standard of admission at that time. The work of collection of material was again under the charge of the curator of
